Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Josh:

We have assistantship applications from four prospectively good algae students but only one good "non-algal" applicant. We would like some more applicants whose interests are in non-algal botanical areas. We feel we can offer excellent graduate training in physiology, morphology-anatomy, pathology and in flowering plant taxonomy in addition to the cryptogamic area. Don't you have a good student to recommend?

Sincerely yours,

Maxwell S. Doty
Chairman
Department of Botany
